

# THE EMPRESS EXPRESS

VOLUME XXIII. NO. 25

EMPRESS, ALTA. THURSDAY, Nov. 28th, 1935

Price: \$2.00 Per Year.

## United Church

Sunday services:  
Empress—  
Sunday School, 2.00 p.m.,  
Church Service, 7.30 p.m.  
Song service, 7.15 p.m.  
Rev. A. T. Bell, pastor.

A whole trainload of Ford V-8's 300 strong, passed through Bassano bound for Vancouver, Wednesday morning. The cars started and marked with the well-known insignia, the Wind-sor, November 15, for export to New Zealand.—Mail, Bassano.

## Alberta's 1935 Wheat Crop

Severe frost which in certain areas of Alberta's crop a crop, on night's last August caused a great deal of damage as is now being brought out by the harvest and very return. In the first place the wheat crop was up to 105,200,000 bushels, while earlier indications were that it would be 20 million bushels larger. Then the crop was brought down so that a approximately 5,600 bushels; 21 million bushels 3 and 4 Northern; and only 32 million bushels 1 and 2 Northern.

## Early Morning Hockey Frolic

The Leader hockey team were visitors in town on Monday for a friendly game with the locals. A number of the team came down by train and others by truck from Leader. Those making the trip by truck encountered trouble on the way and did not reach here until 10 o'clock. The Hockey Club Dance had then started and in order to give the Leader team their game it was decided to play the game at 2 a.m. Accordingly both teams faced each other on the ice for the hour set and on the sound of Alistair Bain Campbell's gong, the midnight ice free, commenced for two tallies each in the introductory period, but the remaining two periods were scoreless. Extra time was called and Leader notched the deciding goal, winning by a 3 to 2 score.

## Advance of Science

Dr. Wilhelm Siekel has established in Vienna, one of the strangest of clinics. It is an institution catering to men and women who have discovered what jealousy is doing to them and who wish to get over being that way.

"Every minute of the day," the psychiatrist stat, "somebody somewhere is being killed through jealousy or taking his or her own life. Thus we are facing a serious plague. And in addition we find we must hold jealousy responsible for countless hours of unhappiness by persons not quite driven to death." The psychiatrist classifies jealousy as a disorder of the emotions or instincts.

## Annual Meeting of Alberta Wheat Pool Delegates

The thirteenth annual meeting of the delegates of the Alberta Wheat Pool will be held in Calgary, commencing Tuesday, November 26. This assembly brings in 70 delegates representing a similar number of districts from the length and breadth of Alberta. These conventions are generally characterized by a thorough study of their organization's affairs by the delegates who are thus enabled to formulate policies and to later supply full information to the membership.

This convention of course is a most important annual feature of the Wheat Pool movement and always arouses a great deal of interest—Pool Budget.

It will be of interest to many to know that food stuffs and other commodities have seen a considerable rise in prices recently according to report, in the United Kingdom. The rise is laid to scarcity caused by droughts and other acts of nature. It will be remembered that Britain will come into effect restrictive measures on various classes of agricultural production.

## Enjoyable Dance

The dance put on in the theatre by the local Hockey Club on Monday, November 25, drew a very good attendance. The crowd was enlarged by the arrival of the Leader hockey Club members late for their game which had been billed for playing previous to the dance. A merry time was enjoyed by all who attended. A pleasant event was concluded at 2 a.m.

## Mantario Nominations

Nominations passed off quietly in R.M. Mantario No. 262 Reeve Dahl and Councillors Montgomery and Francis were re-elected by acclamation for Division 6 in place of C.H. Haw in who was not seeking re-election.

Chief interest in the meeting was in regard to having the Municipality erected into an inspected district for bovine tuberculosis and contagious abortion. A petition was signed during the afternoon for that purpose by about thirty ratepayers.

C. Evans Sargent,  
Sect. Treas.

## Betting Even on Roosevelt

New York, Nov. 23.—Literary Digest Poll of national sentiment revealed in Wall Street odds on Roosevelt's chances of re-election: Roosevelt's title implies, rehabilitated and to re-establish their farms on a more secure and longer time basis. The various methods being proposed are not necessarily new though the idea of rehabilitation program is original in that it provides for the first time organized means of introducing by practical demonstrations methods and types of farming that have been proved by investigation and experience of practical farmers, to be best adapted for the different regions concerned.

The rehabilitation program

is broad in its scope in that it embraces all major phases of the drought problem including the control of soil drifting, grass and forage crop development for feed production, the reclamation of abandoned areas particularly for grazing purposes, tree-planting, soil surveys and last but not least, the program includes resistance in providing water for domestic use and stock watering as well as the development of small irrigation projects particularly where land is feasible.

Leaving Saturday in connection with the program during the past season included mainly the establishment of district stations at each of the eight following points: Pincher Creek, Wainwright, Bradshaw, Crowsfoot, Youngstown, Castor, Lomond and Foremost. The last two stations are entirely new, whereas the others, formerly existing, were re-located into district stations where soil reclamation work, including strip farming and the use of trash covering for soil drift control as well as various cultural practices and cropping systems are being tested and demonstrated. Another project under way at these stations is the growing of annual and perennial crops for winter feed.

Grass development, in which crested wheat grass is featured, is being undertaken in connection with the large area of some 8,000,000 acres in the eastern part of southern Alberta where much of the land previously farmed has been abandoned and ranching or a combination of farming and ranching is developing. No grassing ex-

## Canada May Resume Trade with Russia

Ottawa, Nov. 23.—Resumption of trade with Russia as part of the government's policy of world-wide trade expansion to day was reported in official circles as very probable.

"I think we should trade with every country," Hon. W. D. Elder, Minister of Trade and Commerce, stated today.

Ronald MacDonald remains

as Lord President of the Council, though rejected by the electors of Senneterre. His son, Major Donald, is promoted to be Secretary of the Dominion though he was defeated.

The only member of the former Cabinet to disappear is Lord Londonderry, Lord Privy Seal.

Only newcomer is Alfred Duff Cooper, who succeeded Lord Halifax as Secretary for War.

J. H. Thomas, veteran Secretary for the Dominions, becomes Colonial Secretary to the place of Malcolm McDonald.

Lord Halifax becomes Lord Privy Seal.

Signs of the times are shown in the Quebec elections which took place on Monday. The Taschereau govt. narrowly escaped defeat and was re-elected to office with a scant majority over a combination of Conservatives and a group of Liberal Nationalists. The govt which has been in office for 38 years (Liberal), had 48 seats against 42 for the allied opposition. Returns in a num-

## The Prairie Farm

### Rehabilitation Act

The second anniversary of the Lethbridge Experimental Station Weekly Letter comes with this issue and the occasion seems appropriate to refer briefly to some of the new and important work that is being carried on in connection with the Prairie Farm Rehabilitation Act passed by the Dominion parliament last spring.

This Act was designed to give assistance to farmers on the Canadian prairies where farming, it must be admitted, is to a large extent a ceaseless struggle against drought.

The protective power of the soil even in years of little more than average rainfall is a matter of established record, but past experiences and the drought of the past six years particularly have indicated clearly enough that it is the dry years that need to be provided for in establishing safer and more permanent systems of agriculture throughout the different localities of this area.

The Rehabilitation Act which is being administered by the Experimental Farms Branch, provides, it is believed, a practical and effective plan of attacking the various problems arising from drought by giving leadership in assisting drought sufferers to become, in the title implies, rehabilitated and to re-establish their farms on a more secure and longer time basis.

The various methods being proposed are not necessarily new though the idea of rehabilitation program is original in that it provides for the first time organized means of introducing by practical demonstrations methods and types of farming that have been proved by investigation and experience of practical farmers, to be best adapted for the different regions concerned.

The rehabilitation program

is broad in its scope in that it embraces all major phases of the drought problem including the control of soil drifting, grass and forage crop development for feed production, the reclamation of abandoned areas particularly for grazing purposes, tree-planting, soil surveys and last but not least, the program includes resistance in providing water for domestic use and stock watering as well as the development of small irrigation projects particularly where land is feasible.

# New Rust Resistant Variety Of Wheat To Be Developed During 1936

New varieties of rust-resistant wheat produced by Canadian research institutions will not be released to farmers this coming year, but will be marketed in 1936 "exclusively under the control of the government," a press statement issued following a conference of representatives of the federal department of agriculture and the national research council at Winnipeg.

The new wheat, known as Marquis, Thatcher, hard for rust resistance, was contemplated. This wheat has already been licensed for use in Canada.

The new rust-resistant wheat produced by the rust research laboratory at Winnipeg has been named Marquis. The selection from strains bred at Brandon experimental farm has not been named. The University of Saskatchewan selection is called Apex.

The general suitability of these varieties for western farming conditions, including such factors as yield, strength of straw, earsickness, resistance to rust and to diseases, and to the quality of the grain were critically examined. Several of these tests were found in the extensive tests which were carried out, to be not only very difficult but also to be the chief limitation of yield and quality.

In order to insure the most rapid propagation of this valuable material, it was decided that it will be increased in 1936 exclusively under the control of the organizations. In order to speed the multiplication of the material and to safeguard and to provide against loss through theft, arrangements are being made to have a committee appointed to draw up a code of ethics and to act as a permanent station, Lethbridge, Alberta.

In view of the situation, the committee thought it desirable to make a statement regarding the general acceptance of the material when it is released.

The statement reveals that this wheat ripens two or three days earlier than Marquis and has very strong straw which is slightly shorter than that of Marquis and is more rust resistant. Thatcher is described as the Minnesota experimental station as moderately resistant.

In some seasons it shows as much as 40 to 50 percent more yield than Marquis, but is moderately susceptible to rust and covered smut, but is practically immune to loose smut. In this connection it is of interest that the rust resistant wheats produced in Canada are more resistant than those in the U.S.A. So far, however, the rust infections on Thatcher wheat have not appreciably affected the yield. During these tests conducted at three locations, even somewhat higher yields than Marquis. Under rust epidemic conditions it gives much higher yields than Marquis. In appearance, Thatcher is not equal to Marquis or Reward, the two best bakers, but is equal to the best durum in Italy. In weight per bushel, Thatcher averages slightly lower than Marquis.

In regard to the milling and baking qualities, Thatcher is giving a satisfactory yield of flour which, however, tends to be slightly yellower than the flour obtained from Marquis. Its baking strength is satisfactory.

The meeting was held under the chairmanship of Dr. R. Newton, director of the division of biology of the national research council, Ottawa. Others present were: Dr. K. W. Neyland, Dr. A. G. Macpherson, Dr. W. G. Abbott, and Dr. W. C. Murray. Dr. W. P. Thompson, Dr. T. Thompson, Dr. R. K. Larmour and Dr. J. B. Harrington, University of Saskatchewan; Dr. P. McLean, University of Alberta; Dr. C. G. Gordon, Dr. B. P. Peterson, Dr. J. V. Walker, Dr. J. W. Craigie, Dominion research laboratory; Dr. W. F. Geddes, T. R. Atkiss, Dominion research laboratory; L. H. G. Smith, Dr. G. O. White, eastern experimental farm, Ottawa; Dr. J. G. Mallock, national research council, Ottawa.

One and a half acres of farm land per person is required for the production of enough food for an adequate diet.

Len: "Clark calls himself a human dynamo."

Dun: "Well, why shouldn't he? Everything he has is on charge."

Regardless of the energy expended in washing dishes clean, a film of grease one-millionth of an inch thick always remains on each dish.

Acetylene gas produces the highest temperature of any flame. It approaches 7,878 degrees Fahrenheit.

## For Control Of Cancer

### New Treatment Claims To Have Benefited A Number Of Cases

Authors of the Coffey-Schaeffer cancer treatment, which six years ago became the greatest controversial issue in American medical history, told the American College of Surgeons they believed their system had "benefited a great number of patients than any other method."

The report gave for the first time the results of the first five years of this treatment, which they called a "research."

The authors, W. B. Coffey, and Dr. John D. Schaeffer, of San Francisco, said they had treated 1,800 hopeless, incurable cases, totalling 7,615. Of those, they said 3,872 died before they could be given the minimum course of treatment needed for more than 100 percent recovery.

Of the others they said that a selected list of 1,040 cases, chosen because there was no doubt these persons had hopeless, incurable cancer and no known cause to live, showed to day 605 known recoveries, and 50 believed to be alive but not counted because of incomplete records.

Of the 108 they said 53 are positively free of any signs of cancer; the others still have growths, which, however, have become inactive.

## Waterbucket Full Of Fish

### Welsal Town Has Many Additional Inhabitants In Its Own Backyard

Stories from the Welsal, telling about the village of Llanfairpwllgwyngyllgogerychwyrndrobwllllantysiliogogogoch are wrong. William Richard Smart, tailor, says so.

The same has been published as though it were a history of the church of St. Mary by the pool of white hazels near the swift whiplash of St. Mary's church of the Red Cave.

Smart, living in the garden of his home in the north of north Wales hamlet is Llanfairpwllgwyngyllgogerychwyrndrobwllllantysiliogogogoch, which is translated into English as "The village of the fair pair of pools, the red cave, the white whirlpool in Saint Michael's church near the fish trap."

The town's cemetery is on a body of land which Smart says becomes an island for a certain period every day when the tide is in, for funerals can't be held in the church.

A tree bearing seven different kinds of apples, all of different flavor and exceptionally good, is another of the village's attractions.

## Ancient Cab Still Useful

### Decrepit English Taxi Takes Shit To Boston

An ancient cab, which still has a fancy to a decrepit old taxicab during a visit to England. He had it transported across the Atlantic for an exclusive summer estate near Boston, Mass., and for the past 20 years has plied the streets of Liverpool, made an indelible impression on Mr. Donald Angier, of Chestnut Hill, and of Marion, Cape Cod, where he is based in England. When he got to Boston in 1913, he purchased it for \$30, and had it shipped across the Atlantic at a cost greatly exceeding its value.

The cab, complete with taxi-meter, oil tank, and a trunk, was built by his own. Purchasing it for \$30, he had it shipped across the Atlantic at a cost greatly exceeding its value.

# Indications Point To Progress In Peace Negotiations

Rome.—A reliable source disclosed that the Fascist government had invited anti-Fascist demonstrators to meet, and said the order reflected progress in peace negotiations between Italy and Great Britain and France.

The desire of Fascist leaders for a most restraint in the matter of re-prisals against "sabotage" countries had become apparent since the latest of a series of student demonstrations against foreign ships in Naples.

Consequently, word was passed to subalterns that the foreign-language sign snatching and similar outbreaks which have been directed at foreign property for the past week must halt.

Newspapers were told to drop their heated polemics against Great Britain and France. The editors were instructed to stick to constructive lines, avoid inflammatory material which might provoke ill feelings against the residents of any nationality.

This new policy, informed sources said, did not mean there would be any slackening in preparations to re-enact sanctions.

Fascism's iron rule of squelching "defeatists" who try to profit by war and sanctions was rigidly enforced.

Since the beginning of the year, ships throughout Italy for over-charging frightened persons trying to get their money out of the country have been arrested and "black-bourse" money-lenders were sell the rate at a heavy discount for foreign money have been laid.

Fascist vigilance committees are active at Rome, Barletta, Lucca, Treviso, Padua, and other ports. Ships were searched throughout Italy for over-charging. Frightened persons trying to get their money out of the country have been arrested and "black-bourse" money-lenders were sell the rate at a heavy discount for foreign money have been laid.

Fascist vigilance committees are active at Rome, Barletta, Lucca, Treviso, Padua, and other ports. Ships were searched throughout Italy for over-charging.

Since the beginning of the year, ships

were closed at Pordenone, alone, one at Lucca, another at Treviso and 36 merchants were punished in various ways at Barletta.

## Legion Grand Patron

Lord Tweedsmuir Has Consented To Take The Oath

Ottawa.—Lord Tweedsmuir, governor-general of Canada, has consented to become Dominion grand patron of the Canadian Legion. J. B. E. Dowler, general secretary of that organization, announced here.

Arriving from Tweedsmuir on his arrival in Ottawa was an invitation from General Ross asking His Excellency to succeed the Earl of Bessborough as grand patron.

The insignia of office will be presented to the governor-general at a later date, said Mr. Bowler.

## Hardy Gophers

Calgary.—May is going to be a mild winter in southern Alberta. Conditions are favorable for the gophers which usually hibernate for the winter, still striking about in deep snow, robins chirping merrily in the trees, and ducks swimming in open water on the rivers.

## Gas From Clover

St. Paul.—Discovery of a method for manufacturing a commercially adaptable gas from ordinary clover was claimed by two students by Dean R. U. Jones, head of the Macalester college chemistry department.

**Plea For Co-Operation In Furthering Alberta's New Social Order**

Calgary.—A plea for co-operation in the institution of Alberta's new social order and for constructive criticism only of the present party was made by Premier Aberhart here when he addressed more than 500 southern Alberta high and public school teachers.

Mr. Aberhart, also minister of education, told the teachers the main problem facing members of their profession to-day was adapting themselves to their community in such a way as to take a greater share in the progress of the province.

"If teachers do not see how they fit into the new plan, they will be 'back numbers' in five years," the premier said. "If you do co-operate, you will be back in the secondary years when the government is in the process of being unable to get along without you."

"This is the teachers' opportunity," he continued. "You should put your

## World Wheat Crop

### Said To Be Lowest Production Since 1924

Home.—World wheat production this year will be the lowest since 1924 with the Soviet Union having a bumper crop, the International Institute of Agriculture announced.

Production in 1935 is expected to increase, however, was found to be greater in 1934 than the lowest increase since 1924. Exportable wheat for the season of 1935-36 is 25,000,000 quintals (a quintal is 3,671 bushels) less than the 1934-35 season and the lowest in the past 10 years.

Exportable wheat this year will be 218,000,000 quintals, of which 100,000,000 remain from previous years.

World imports for 1935-36 are estimated at 147,000,000 quintals compared to 144,000,000 in 1934-35. The 1935 export surplus is insufficient to cover probable demands of countries.

The 160,000,000 quintals carryover at the beginning of this year has already been reduced and experts predict it will be reduced further.

## Remember Canadian Corps

### Trappist Monks Of Belgium Donate Wreath To Canadian Corps

Orléans.—For the first time since the war there was a renewal in Orléans of the association between the ancient Trappist monastery of Mont des Cats, in Belgium, and the Canadian corps when on Remembrance Day the Belgian representative, the abbot, came here by mandate of the Belgian government by Maurice Ollivier, of Ottawa, for, and on behalf of that institution.

Mont des Cats, a towering ridge which overlooks the plain of Flanders, was well known to Canadian soldiers, many of whom were treated in their latest stages of convalescence at the ancient monastery.

## Grain For Italy

### Small Shipment Of Canadian Grain To Go Forward

Montreal.—A small consignment of Canadian grain will leave here for Italy, officials of the Montreal Shipping Company announced.

The S.S. "Spartacus" will leave here on Aug. 8, 1936, with 500 barrels of oats to Genoa, Italy. The remainder of the vessel's cargo of 80,000 bushels of grain will be loaded at Marseilles, France.

### Products End Of Rust

Montreal.—Prediction that destruction of Canadian wheat crops by rust would be a thing of the past by 1937 was made by Hon. J. B. E. Dowler, general minister of trade and commerce. Mr. Dowler opened the National Product in Canada Exhibition here.

### Export Of Silver Forbidden

Tokyo.—Execution by a firing squad of 100 Chinese who had been found guilty of smuggling silver had been ordered by General Sung Chia-Yuan, chief of police in the Peiping and Tientsin areas of North China.

## May Reduce Forces

### Some Warships In Mediterranean Likely To Be Withdrawn

London.—Progress toward a joint reduction of British and Italian forces in the Mediterranean was believed by informed sources to be under way.

British naval authorities announced at No. 10 Downing street after Sir Eric Drummond, British ambassador to Italy, conferred with Premier Mussolini at Rome.

It was also disclosed to government

that the ministers considered a reduction of the reinforced British fleet in the Mediterranean to help ease the Anglo-Italian tension.

In particular, the British were expected to take some of their warships out of the Mediterranean in exchange for further withdrawals of Italian troops from Libya, but that no announcement of this settlement was expected until after the British elections Nov. 14.

A stop to the anti-British campaign in Italy would be one condition of the settlement, it was said.

Some naval sources said that the British might provide 300 Italian troops for the season of 1935-36 which will be 218,000,000 quintals, of which 100,000,000 remain from previous years.

World imports for 1935-36 are estimated at 147,000,000 quintals compared to 144,000,000 in 1934-35. The 1935 export surplus is insufficient to cover probable demands of countries.

The 160,000,000 quintals carryover at the beginning of this year has already been reduced and experts predict it will be reduced further.

## Farm Debt Legislation

### To Be Tested Before Supreme Court

Ottawa.—Supreme Court of Canada will be asked to test constitutionality of the Farmers' Creditors Arrangement Act, it was announced by Minister of Agriculture L. Laprade. It will be examined by the court in the same general reference as the reform bill and price spreads legislation.

An audience demanded enlightenment that his earlier gesture in withdrawing one division of troops from Libya had not resulted in some reduction in the neighboring British fleet.

## Hebburn To Retire

### PRIME MINISTER

Hon. W. J. Patterson, who has just been elected Premier of Saskatchewan in his second term, is shown in this portrait.

## Farm Debt Solution

Under a Farmers' Or Municipal Think Farm Bankers Should Govern Debt Payments.

Heralded as solution of debt adjustment, correction of debt payments to individual farms earnings was asked by the United Farmers of Manitoba convention at Portage la Prairie.

The index price of farm commodities and the 10-year average of the farm production would be the yardstick for debt payments.

Portage la Prairie voted before the delegates for a while but a resolution asking return to politics was overwhelmingly rejected. With 100 per cent of the resolution adopted, the convention adjourned. The 25-year-old farm organization voted itself out of politics in 1929 and has at several conventions confirmed the stand.

Portage la Prairie's opinion developed when the section urging import and export bonds was deleted from the report on tariff and taxation by Vice-President W. J. Davidson of Manitoba.

Loss of control of the powers of an audit board, and a remark by J. L. Brown of Pilot Mound, that it looked like approval of Co-operative Commonwealth Federation principles, led to formal defeat on

"pure" farm adjustment lower tariffs, refunding of public debt, at lower interest rates, and co-operation of taxation to avoid duplication and economies. About 90 per cent of the sales tax, and lower bracket income taxes were favored.

The resolution dealing with debt adjustment asked that "farm mortgage contracts should be re-written on an amortization basis, and that the annual amortized payments should fluctuate in relation to the percentage rise and fall of index price of farm commodities."

D. W. Hall, director from Princeton, who had 90 per cent of the population vote him into his home if compelled to pay debts now. Investors in mortgages should suffer losses with the mortgagors, he contended.

## Psycho-analyze Truants

No More Playing Hockey By Application of Educational Methods

All the fun and romance of "skiping school" has been eliminated by modern educational methods, according to Arthur S. Hill, director of pupil adjustment in Des Moines schools.

So scientific is the modern procedure that such as "hooky," "truant officers" and "spanking" have been eliminated.

In Des Moines schools, "skipping school" now is referred to as non-attendance; the truant officer has been replaced by visiting teachers. Students have been separated by a pupil adjustment department where offenders are psycho-analyzed.

One of the most common causes for non-attendance at school, Hill explained, was the lack of personal progress of some. Some advanced through grades more rapidly than they should and when they encountered difficulty they lose interest.

Under the department of pupil adjustment, a committee which has assimilated the truant officers, necessary corrections are made before harm is done to the pupils, Hill explained.

## World's Fastest Driver

Campbell Is Content To Rest Providing Forwards Are Quiet

Sir Malcolm Campbell, at a Royal Automobile Club luncheon held in London recently, said: "I am now making my bow, and keeping my place in the limelight, but I am not racing." But a twinkle crept into his eye, as he added, "unless a foreigner beats the record." Captain Euston said that, although his own best record was 110 m.p.h. for 100 miles, for 24 hours his average petrol consumption was only 10 miles a gallon—a triumph for British engineering. He and Sir Malcolm emphasized that the American public had helped him in their successful efforts. "That friendship can hold the world at peace. Let us cultivate it," Sir Malcolm said.

## Steam Locomotives

Canadian Pacific Railway head office announced the construction of five "light-weight streamlined locomotives" to be placed in service between Montreal and Quebec. The announcement said the locomotives, being built to attain a speed of 110 miles an hour, would be the first of a new series to be constructed.

Custos bring their own food and refreshment to weddings in the small Yugoslavian agricultural towns.

## PREMIER KING AND HIS NEW DOMINION CABINET

Above are the gentlemen chosen by Mr. W. L. Mackenzie King to fill the ministerial offices in the new Dominion Government at Ottawa. They are, top, left to right: Hon. Charles A. Dunning, Minister of Finance; Hon. Ernest Lapointe, Minister of Justice; Hon. W. D. Eeler, Minister of Trade and Commerce; Hon. Clarence D. Howe, Minister of Railways and Canals and Minister of Marine. Left, centre, reading from top: Hon. Norman Rogers, Minister of Agriculture; Hon. G. C. Scott, Minister of Pensions and Hon. H. H. Ferguson, Minister of National Health and Welfare. Right, centre, reading from top: Hon. J. E. Small, Postmaster-General; Hon. F. J. A. MacKenzie, Minister of Public Works; and Hon. Ian Mackenzie, Minister of National Defence. Bottom, left to right: Hon. J. E. Michaud, Minister of Fisheries; Hon. T. A. Creer, Minister of Mines, Immigration and Colonization, Interior and Indian Affairs; Hon. J. G. Gardiner, Minister of Agriculture; and Hon. J. L. Sibley, Minister of National Revenue.

## Skim-Milk For Calves

Feeding Should Be Continued Even After Six Months

After a calf is five months of age, milk may be gradually reduced and finally discontinued when the calf is 5½ to 6 months of age. If it is good practice to continue feeding longer.

If the calf-milk is reduced, the dry grain should be increased gradually up to two or three pounds per day. The same mixture suggested for younger calves may be continued, viz., equal parts of grain and clover chaff.

The calf should be crushed after the calf is six to seven months of age as she begins to shed her teeth at that age and may have difficulty in chewing the whole clover chaff. Clover hay should be fed in small amounts, allowing the calf all she will eat. If green feeds, such as green clover or the oats, peas and vetch mixture is used they should be fed carefully and to only a limited extent.

When the calf goes into winter quarters she should be fed, in winter, to hay and grain, a certain amount of protein being required.

The object throughout this period should be to push the calf along as rapidly as possible. A dollar's worth of feed will give more growth than a dollar's worth of grain.

The object throughout this period should be to push the calf along as rapidly as possible. A dollar's worth of feed will give more growth than a dollar's worth of grain.

When you are baking a rich cake that takes a long time to cook, sprinkle salt over the bottom of the oven and you won't need to put paper in your pan.

"Atkernine," which is being used to combat malaria in Ceylon, is reported to be cheaper than quinine and more effective in establishing longer immunity.

There are 65,000 square inches of skin on the human body.

China's war on opium is showing results.

## Cures High Blood Pressure

Doctor Clips The Sympathetic Nerves In Such Cases

High blood pressure, one of the maladies attributed to the increased tempo of modern life, apparently is being cured by a simple operation.

Speaking before one of the closing sessions of the annual meeting of the Interstate Post-graduate Medical Association, Dr. George Crile said that a democratic operation, based on 52 of his patients for the relief of malignant hypertension, or high blood pressure, had obtained remarkably favorable results.

The operation, performed by a Philadelphia surgeon pointed out, however, that his work in this field had not been carried on long enough to enable him to see that the cures effected surgically were permanent. The first of the operations for malignant hypertension was performed about 3½ years ago, he said.

Contrary to the belief formerly held, Dr. Crile said, the fulminating nature of malignant hypertension, which causes death in a few days, is due to the sympathetic nerve system leading to the thyroid of adrenal glands rather than in the glands themselves.

Dr. Crile, technician in treating malignant hypertension, has developed a method of clipping some of the sympathetic nerves supplying the glands and thus preventing them from sending the activating substance into the blood stream.

Tom—"Why don't you marry her?" Dick—"I have thought about it, but where would I spend my evenings then?"

What can Ethiopia possibly do with all the rain she gets?

The teacher—Johnny, can you tell me what a hypodermic is?

Johnny—Yes, madam. It's a boy what comes to school with a smile on his face.

# Find Out

From Your Doctor  
if the "Pain" Remedy  
"You Take Is Safe."

"Don't Entrust Your  
Own or Your Family's  
Well-Being to Unknown  
Preparations

**Before** you take any preparation, don't you know all about, for the relief of headaches or the pain of rheumatism, or neuralgia, ask your doctor what he thinks about it — a companion with you.

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were adulterated with opium, as well as for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medicine.

Countless thousands of people who have taken aspirin in and out without ill effect, have proved that the medical findings about its safety are correct.

Remember this: "Aspirin" is rated among the fastest methods of dissolving clots in the blood, and all common pains... and so for the "average" person to take regularly.

Aspirin, "Tablets in Capsules," "Aspirin," is the registered trade-mark of the Bayer Company, Limited. Look for the same Bayer initials in the form of a cross on every tablet.

Author of  
"One Wide River to Cross,"  
"The Unknown Port," etc.

### SYNOPSIS

Nancy Nelson is a six-12, a very trimmable girl of nineteen, with no care beyond the choice of her costume for her coming-out party. She and her mother, Mrs. Nelson, an indulgent father loses all he had, and his family is faced with the necessity of finding a new way of living. At this juncture a letter is received from a man, a Mr. Mathew Adams, who offers the girl a home on what seems to be impossible conditions.

After much deliberation Cousin Columbine, "I," is accepted. Nancy, a tall girl, with a pink ridge, set out on her way to Pine Ridge.

Nancy set out one afternoon to climb the top of the hill to obtain a view of the surrounding landscape and misses the Aurora Trail. She is lost, and when she comes along the road, driven by Matthew Adams, and she asks him which way she should go, he says, "Look around, and then go on to Cousin Columbine's." Then, Mark Adams, who is a man that Nancy Luke has broken his leg, and that Jack Nelson has a sore back, and that out of his sore leg it feels better. With Jack away, Nancy finds that she is lonely, but she reads, she reads, she reads. The idea of starting a public library at Pine Ridge seems a good one, and she goes to the town, and her parents to send all the books they could spare, and all they could afford.

Nancy's parents and friends gave their liberal support to her request for the library, and she was soon in full course. Father Adam painted a sign for the library, and added boy to boy, and on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew Adams, and there, when Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the snow, they are unable to find their bus full of school children, which was stalled across the road with its back wheel broken. Nancy and Jack, their car being wrecked, Jack and Nancy, with the children and all the rest of the bus passengers, are left in the snow. Nancy, it will shed some light on this strange mystery. Carry box and all into the house and we'll examine them."

In this absorbing interest the note was written, for the crucial carved in" — questioned. Nancy, who gave post properly at last, the subject was removed at the dinner table.

"Chaledony, I think," said Cousin Columbine, "but you must have summer marks and finger-scarps on the Maltese cross." Hand work, and very, very ancient, if I may judge.

These things are of real historical value, Nancy. They should be in some museum; but surely you have the right to keep them for the pres-

are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but they are soon recovered.

**Now Go On With The Story**  
CHAPTER XXIII.—Continued

"It's fortunate they're so much taller than the fence," said Jack. "I suppose they were intended to be impaled, but we can lower them a foot or two, but we'll have to get them down to the ground to get them to recover."

"Now Go On With The Story

ent. In my own mind there's not a doubt that they came from one of the Spanish expeditions. Dear me! what a story we shall have to tell the Adams! Did Mark say what time they were taken down to the ground?"

"Not before five. I have some things to do at the library this afternoon; and I must finish packing so that to-morrow will be free. It gives me a terrible feeling, Cousin Columbine, to think how soon we're going to leave you."

"And it gives Miss Columbine a worse one," declared Nancy as she took a ripe apple plucked from the same tree. "Proprietary plums won't do the same again, if you notice, that it won't be before's never since you came with the Aladdin Library everything. You have had an awful score, Cousin Columbine, and Nancy, even if you had got her, she wants her dresses darker' I like on a young girl, or an old one either for that matter. But she's run out of money, and Nancy, I'm telling you, she's got her hands full. To-morrow she's going to Colorado City where she learns shorthand. I hope she don't marry some good-for-nothing fellow afterward. No use you spending your life on a waste tub."

That afternoon when all but the last-minute packing was accomplished, Nancy, with the whole crew, sat down to wait for the Adams, and sought the library.

"For the hand-wash what are you doing to your stomach in all that dirt?" cried out Aurora, who had drawn near to superintend the work.

"Hunting for buried treasure," Jack answered, "but I'm afraid it's eight o'clock, and I'm afraid I'm afraid."

"Hurry up, hurry up, hurry up!" cried out Cousin Columbine, who, hearing Nancy's elated voice, had hurried out. "Mercy, child! have you been digging that hole with your two hands?"

Nancy laughed and answered: "Well, all come out in the wash, Cousin Columbine! You see, I've uncovered something down there — something that's evidently been buried for ages. I thought at first it was a skull, but it's a skull, and it's a skull, and it's a skull."

"For the hand-wash what are you doing to your stomach in all that dirt?" cried out Aurora, who had drawn near to superintend the work.

"Hurry up, hurry up, hurry up!" cried out Cousin Columbine, who, hearing Nancy's elated voice, had hurried out. "Mercy, child! have you been digging that hole with your two hands?"

Nancy laughed and answered: "Well, all come out in the wash, Cousin Columbine! You see, I've uncovered something down there — something that's evidently been buried for ages. I thought at first it was a skull, but it's a skull, and it's a skull, and it's a skull."

"Hurry up, hurry up, hurry up!" cried out Cousin Columbine, who, hearing Nancy's elated voice, had hurried out. "Mercy, child! have you been digging that hole with your two hands?"
